Full Stack JavaScript Developer | Frontend Specialist | Available for Remote & Relocation

PROFESSIONAL SUMMARY

Senior full-stack JavaScript engineer with 5+ years of experience delivering scalable web, mobile, and desktop applications in high-traffic production environments. Specialized in React, Next.js, TypeScript, and Node.js with deep expertise in state management for large-scale applications using Redux, Context API, and React Query. Strong focus on frontend performance and clean architecture. Proven track record of measurable impact: Lighthouse scores improved from 70 to 98%, page load times reduced from 8s to 1s, and API response times cut by 99% (10s to 102ms). Open source contributor and fully bilingual in Spanish and English.

PROFESSIONAL EXPERIENCE

Full Stack Developer | Ensitech (Contractor for GoDaddy Inc.) — *Nuevo León, MX* | May 2022 – Present

- Optimized frontend performance, cutting page load time from 8s to 1s via memoization, lazy loading, and useCallback — directly improving Core Web Vitals.
- Elevated Lighthouse scores from 70 to 98% (Performance, Accessibility, Best Practices, SEO) across GoDaddy web properties.
- Optimized critical Node.js/Express endpoints, reducing response times from 10s to 102ms (~99% improvement).
- Built scalable interfaces with Next.js (SSR & App Router) for high-traffic GoDaddy web properties.
- Introduced Storybook for isolated component development, accelerating design reviews and QA cycles.
- Standardized commit workflow with Husky + lint-staged + commitlint, eliminating formatting errors repo-wide.
- Developed and tested RESTful APIs with Node.js, Express, and TypeScript; E2E and unit testing with Cypress and Jest.

Full Stack Developer Jr. | Netjer Networks — *Mexico City, MX* | Oct 2021 – Oct 2022

- Built infrastructure monitoring and management tools for top-tier Mexican enterprises including FEMSA and Alcea Group, enabling real-time detection of service outages and hardware underutilization.
- Designed and deployed CI/CD pipelines automating server provisioning and significantly reducing manual deployment errors.
- Integrated AI-powered automation bots (CloudFabrix) to streamline business workflows and maximize IS hardware usage.
- Administered Linux servers on AWS for deployment and maintenance; customized ERP Odoo to client requirements.

Frontend / Backend Developer | Kioru — *Pachuca, MX* | Sep 2019 – Nov 2020

- Co-built a national web platform for managing educational institutions (schools, universities) reaching 100,000+ users across Mexico — contributed REST API endpoints and responsive frontend interfaces.
- Developed React Native mobile apps for enterprise clients Cotemar and Saeko, delivering cross-platform iOS and Android experiences.

- Built desktop apps with Electron + Material UI; maintained Ruby on Rails APIs; architected 100% open-source infrastructure stacks to minimize client costs.

EDUCATION

B.Eng. Software Engineering — Universidad Politécnica de Pachuca, Pachuca, MX | 2016 – 2020

Advanced Continuing Education — Frontend Masters

- CSS Systems
- React / Next.js
- Full-Stack JavaScript
- State Management at Scale in React & Next.js

TECHNICAL SKILLS

Core Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Node.js, Express, Ruby on Rails

State Management: Redux, Context API, React Query — large-scale application architecture

Frontend & UI: Tailwind CSS, Material UI (MUI), Storybook, React Native, Electron, Core Web Vitals

Testing & Quality: Cypress, Jest, Postman, Husky, commitlint, lint-staged

DevOps & Cloud: Docker, AWS, GitHub Actions, CI/CD, Nginx, Linux

Databases: MariaDB, MySQL, MongoDB, DynamoDB

Other: REST APIs, Socket.IO

CERTIFICATIONS

- Real-time Apps with Socket.IO
- RESTful API Development — Ruby on Rails
- API Testing with Postman
- Complete SQL Mastery

OPEN SOURCE & COMMUNITY

Universal G-Code Sender — github.com/Ismael-devTR/Universal-G-Code-Sender

Contributor to the widely-used Java-based CNC machine controller tool utilized by makers and engineers worldwide.

OpenSource Raspberry Pi Case — github.com/Ismael-devTR/OpenSource-Rasp-case

Open-license hardware enclosure design for Raspberry Pi, freely available for the maker and engineering community.

LANGUAGES

Spanish: Native

English: Professional Working Proficiency (Conversational)
